

Seal Rebuilding Kit Tools

Seal rebuild kits are a big cost savings value over replacing functional swivels that have worn seals. Each product page lists corresponding rebuilding kits for that swivel.

To simplify replacement of worn seals we offer these tools:

Seal Installation Cone; you simply slide your replacement seals over the cone, then slide them over your existing swivel. No twisting and fumbling with new seals trying to get them over the swivel.

Seal Resizing Ring; after the replacement seal is in position use the ring to reshape and size the seal when in place.

For use with Swivel Item #:
15009, 15010, 24022, 24059,
24073, 24074, 24089

Seal Installation Cone
T-PB12-Cone
Item #11025

Seal Resizing Ring
T-PB12-Ring
Item #11028

For use with Swivel Item #:
23048, 23113, 23152

Seal Installation Cone
T-PB8-Cone
Item #11021

Seal Resizing Ring
T-PB8-Ring
Item #11022

For use with Swivel Item #:
16050, 25061

Seal Resizing Ring
T-PB16-Ring
Item #11030

Seal Installation Cone
T-PB16-Cone
Item #11029
